

ELEVENSIES

OFFICIAL PLAYER PRIVACY POLICY • LAST UPDATED: JUNE 2026

This Privacy Policy explains how your data is collected, used, stored, and protected when you play **Elevensies** (the "Game"). We are fully committed to keeping your player data transparent, minimal, and highly secure.

1. Information We Collect

To provide a seamless gaming experience and save your progress, we collect the minimum amount of data required:

- **Account Information:** Your email address and basic public profile metadata when you register via standard credentials or third-party social authentication providers (such as Google, X, or Facebook).
- **Gameplay History:** Your daily puzzle scores, completed move matrices, puzzle grids, streak counts, and continuous game progression statistics stored securely inside our database.
- **Marketing Preferences:** Your explicit consent choices regarding whether you choose to receive newsletters, puzzle drops, or promotional announcements about the Game.

2. How We Use Your Information

We use your data strictly to maintain, analyze, and improve your interactive experience:

- To manage your cloud player profile and securely back up your daily 11-turn score records across devices.
- To operate competitive global leaderboards or opt-in multiplayer mini-leagues.
- **Marketing Opt-In:** If you explicitly authorize communications during registration, we will occasionally send you game updates. You maintain the absolute right to opt-out at any time via the unsubscribe mechanism at the bottom of these emails.

3. Data Storage & Third-Party Infrastructure

We utilize secure, industry-standard infrastructure providers to route, distribute, and host your data. Your information is processed through the following external entities:

- **Database Infrastructure (Supabase):** Handles your encrypted account credentials, secure player records, and scoreboards.
- **Application Edge Hosting (Vercel):** Serves the live web application interface and optimized static frontend assets globally.

- **Email Deliverability (Resend):** Distributes transactional server notifications (such as sign-up links or password resets) and authorized marketing dispatches.

4. In-Game Purchases & Monetization

If the Game introduces premium expansions, ad-free tiers, digital merchandise, or microtransactions in the future:

- All financial transaction execution will be performed entirely by secure, end-to-end encrypted third-party payment gateways (such as Stripe, Apple App Store, or Google Play).
- **We never view, log, or store your credit card details, billing numbers, or banking credentials** within our infrastructure.

5. Business Transfers & Selling the Database

In the event that Elevensies undergoes corporate restructuring, merger, asset lease, or total commercial acquisition:

Important Notice: The integrated user database containing player email addresses, analytical metadata, and historical gameplay parameters may be transferred to the acquiring entity as a core business asset. This structural processing guarantees that your active player history and user profile remain unbroken and operational under alternative or modified ownership.

6. Your Rights & Data Deletion

You maintain full control over your personal data. Depending on your regulatory jurisdiction (including the UK GDPR and EU regulations), you have the absolute right to inspect the personal details we store or request their immediate destruction.

You can permanently delete your profile, email indicators, and total high score records at any given moment directly from your game interface.

7. Account Removals & Data Erasure

In-App Deletion (Automated): You can instantly and permanently purge your entire player profile, gameplay history matrices, and record configurations by navigating to your player profile dashboard within the Game and selecting the **"Delete Account"** button. This action triggers a secure server script that removes your records from our database environments immediately.
